Adventure Escape SA

Website and mobile app design

Explore. Discover. Thrive.

Group presentation by Rayan, Itumeleng and Asukia

The scenario we chose

- Scenario 2: Adventure Escape SA, owned by Liam Daniels
- Guided outdoor packages and individual activities
- For families, teenagers, tourists, schools and corporate groups
- Needs a website and a mobile app to advertise, show prices and take booking requests

4
Packages
R1 500 each

3
Individual activities
R750 each

5-15%
Discount
2 bookings 5%, 3 bookings 10%, 4+ bookings 15%

Design choices and why

Navigation

- Simple menu: Home, About Us, Overview, Fees, Contact Us
- Sticky header stays visible

Layout

- Hero banner with key buttons
- Same layout on every package page

Responsive

- Flexible grids and images
- Cards stack into one column on mobile

UI design

- Large, clear buttons
- Orange and green for actions

Forest green
Nature, mountains, forests

Burnt orange
Excitement and action buttons

Sand beige
Calm, outdoor, Western Cape

Our logo

Explore. Discover. Thrive.

- Chosen by group vote: most members found it the most professional and exciting
- Forest green stands for nature, mountains and forests
- Burnt orange sun and dotted trail ring show a rising or setting sun
- Sand beige badge feels outdoorsy and matches Western Cape scenery
- Clear even as a small app icon
- Not chosen: the black and white logo (too plain) and the third logo (too simple)

Tools we used

1 Figma

Low-fidelity wireframes for the website and mobile app

2 Visual Studio Code

Writing the code for the website and mobile app

3 GitHub

Version control: store, share, track and review code

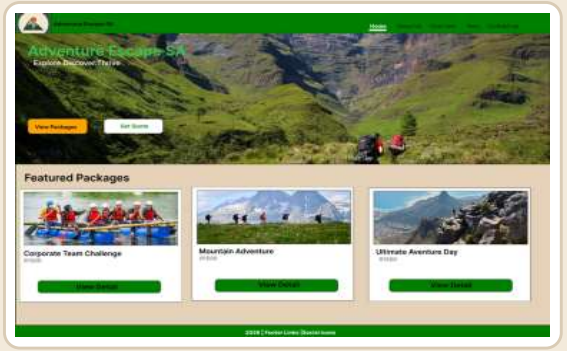

4 Google Drive / Microsoft

Share notes, documents and research

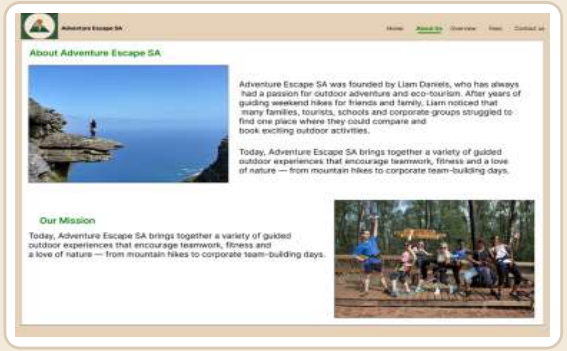

5 HTML, CSS, JS, React Native

Build, style and add interaction to the website and the mobile app

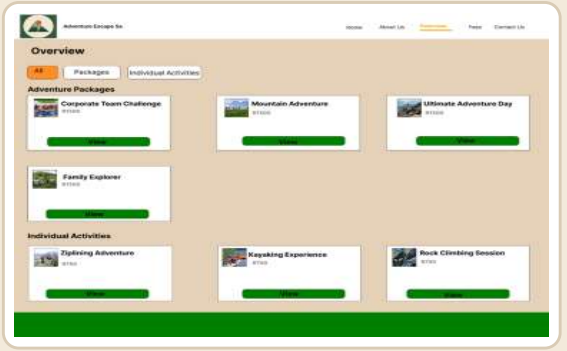

Website wireframes

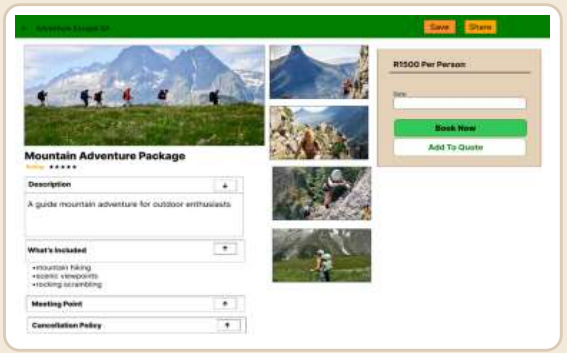

Home

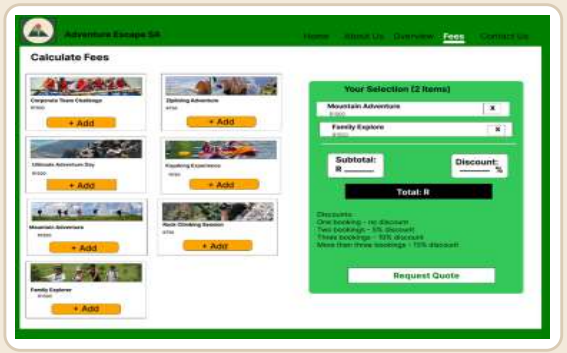

About Us

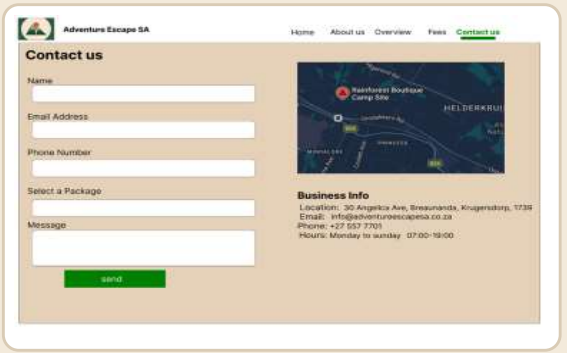

Overview

Package details

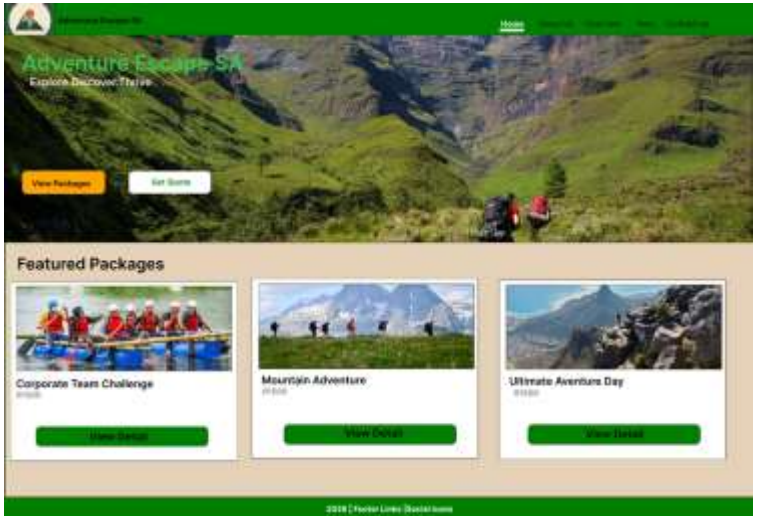

Fees

Contact

Website: Home page

What this page does

- Banner with the tagline Explore. Discover. Thrive.
- Two big buttons: View Packages and Get Quote

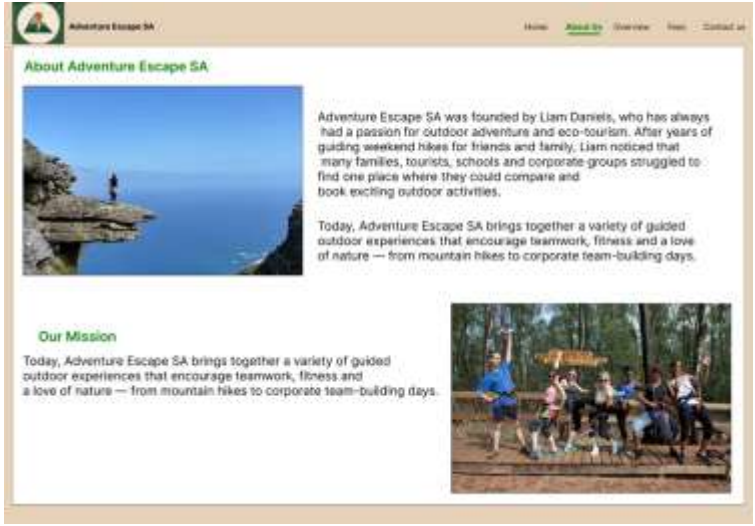

How it works

1. The visitor sees the banner and the featured packages
2. View Packages opens the Overview page and Get Quote opens the Fees page
3. View Detail on Mountain Adventure opens its details page
4. Any picture bounces when pressed (JavaScript)

Why we designed it this way

- The most important actions come first

Website: About Us page

What this page does

- Tells the story of Liam Daniels, who started the company
- Explains the company: guided outdoor experiences for teamwork, fitness and love of nature

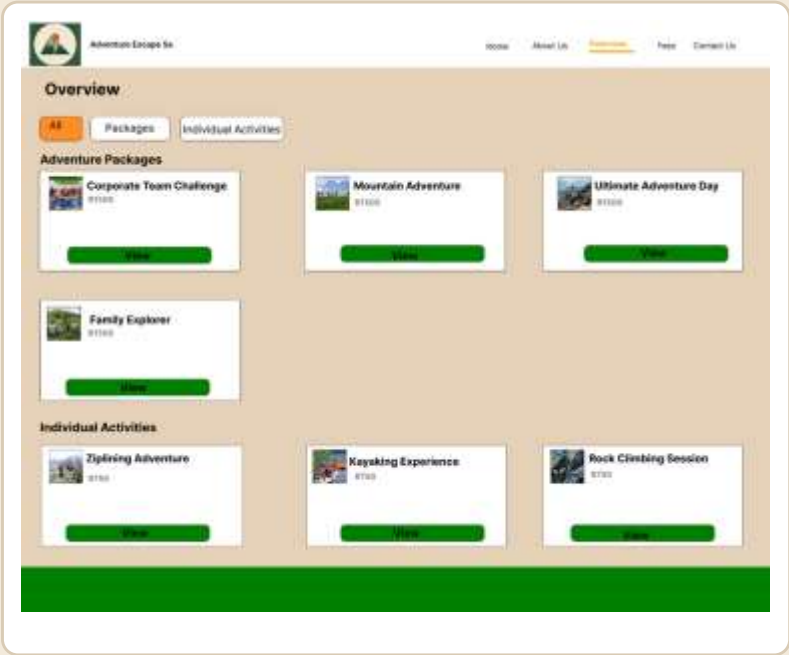

How it works

1. The visitor reads the story of Liam Daniels and the mission
2. The menu at the top moves to any other page
3. Pictures bounce when pressed

Why we designed it this way

- Builds trust with a real story and real people

Website: Overview page

What this page does

- Shows everything we offer in one place
- Filter buttons: All, Packages and Individual Activities

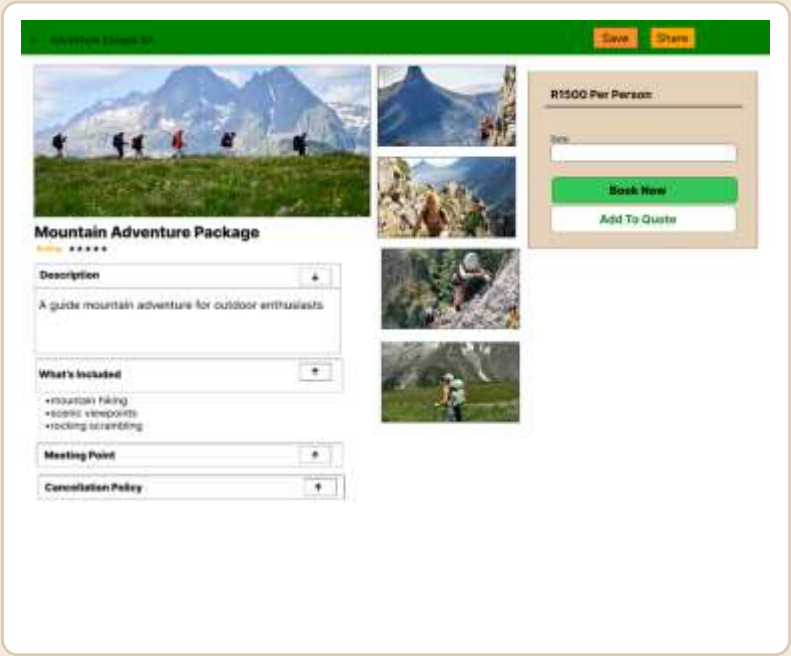

How it works

1. Press Packages: only the packages show
2. Press Individual Activities: only the activities show
3. Press All: everything shows again
4. Press View on Mountain Adventure to open its details page

Why we designed it this way

- Customers can compare options quickly

Website: Package details page

What this page does

- Large picture with four more pictures, title and rating
- Arrows open and close Description, What's Included, Meeting Point and Cancellation Policy

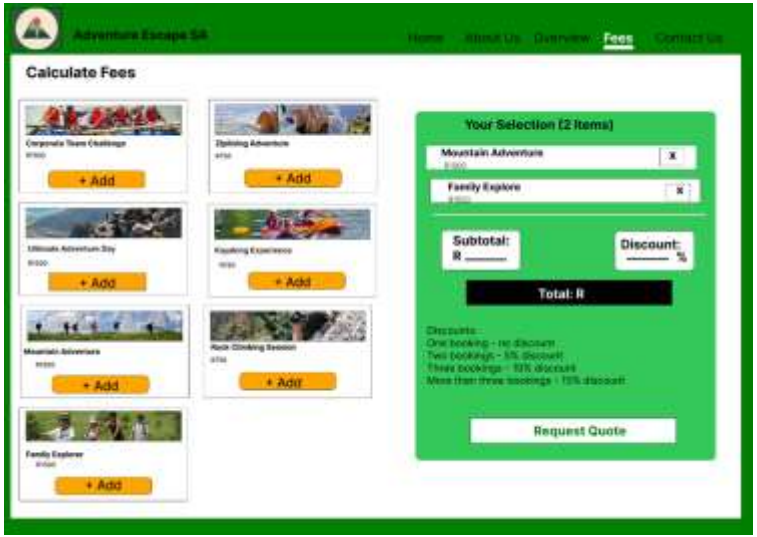

How it works

1. Press an arrow: arrow down opens the section and shows the information, arrow up closes it
2. Choose a date and press Book Now: a booking message appears (it asks for a date first)
3. Add To Quote saves the item for the Fees page
4. Save downloads a screenshot, Share sends the page link

Why we designed it this way

- Same layout for every package, so users know where to look

Website: Fees page

What this page does

- All packages and activities with an Add button
- Your Selection box updates every time something is added or removed

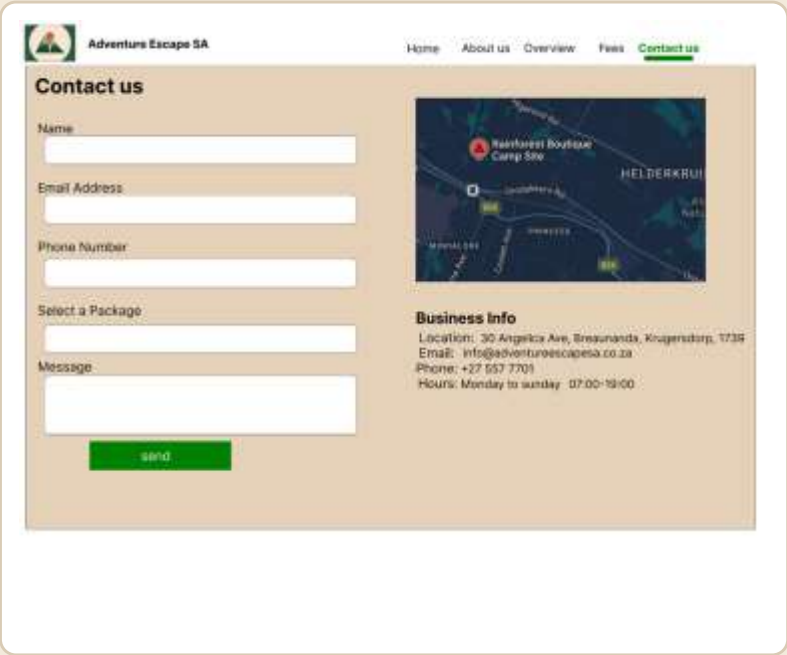

How it works

1. Press + Add: the item goes straight into Your Selection
2. The subtotal, discount and total change every time
3. Press X to remove an item and the total updates again
4. Request Quote shows the quote message

Why we designed it this way

- Customers see the price before they contact us

Website: Contact page

What this page does

- Form: name, email, phone number, package and message
- Send button shows a thank-you message with the customer's name

How it works

1. Fill in name, email, phone number, package and message
2. Press send: JavaScript checks the name and email
3. A thank-you message appears with the customer's name
4. Map and business information are shown on the right

Why we designed it this way

- Easy to reach us and to ask about a package

Mobile: 01 Splash

What this page does

- Logo, name and Cape Town, Western Cape
- Photo and the tagline Find your next great escape
- Explore adventures button and a Log in link

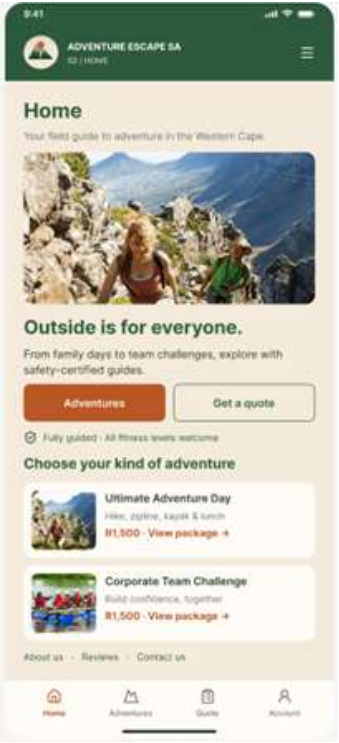

How it works

1. The screen appears when the app opens
2. Tap Explore adventures to go to Home
3. Tap Log in to go to the Login screen

Why we designed it this way

- A strong first impression with the brand colours
- One clear button to start

Mobile: 02 Home

What this page does

- Hero photo and the message Outside is for everyone
- Buttons: Adventures and Get a quote
- Note: fully guided, all fitness levels welcome, and popular adventure cards with prices

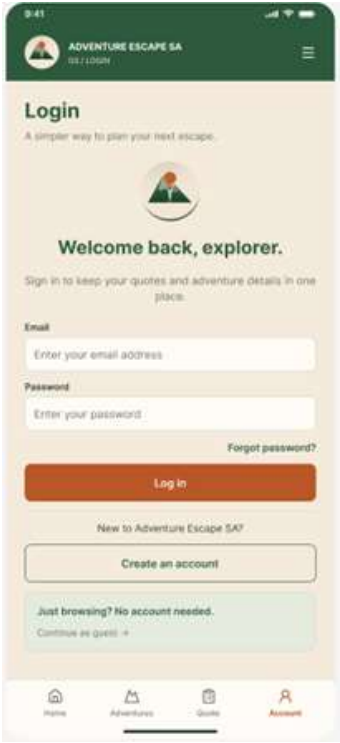

How it works

1. Tap Adventures to browse, or Get a quote to open the Quote screen
2. Tap a package card to see its details
3. The bottom menu switches between Home, Adventures, Quote and Account

Why we designed it this way

- Same main actions as the website Home page
- Bottom menu: Home, Adventures, Quote, Account

Mobile: 03 Login

What this page does

- Email and password fields, Forgot password link
- Log in and Create an account buttons
- Continue as guest, so no account is needed

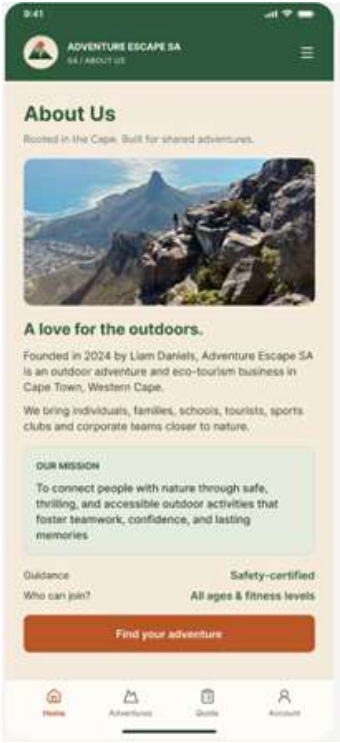

How it works

1. Type the email and password, then tap Log in
2. Forgot password? and Create an account are for returning and new users
3. Continue as guest skips the login

Why we designed it this way

- Users can save quotes, but they are never forced to sign up
- Short form with large fields for thumbs

Mobile: 04 About Us

What this page does

- Story of the company and Liam Daniels
- Our Mission box, guidance (safety-certified) and who can join (all ages and fitness levels)
- Find your adventure button

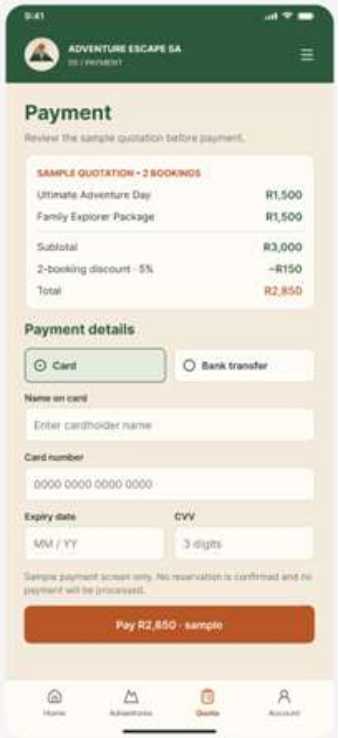

How it works

1. Scroll to read the story and the mission
2. Tap Find your adventure to go to the adventures

Why we designed it this way

- Builds trust before the user books
- Key facts in a small box that is easy to read

Mobile: 05 Payment

What this page does

- Sample quotation for two bookings: R3 000 less 5% (R150) = R2 850
- Choose Card or Bank transfer
- Fields for card details and a Pay button (sample only)

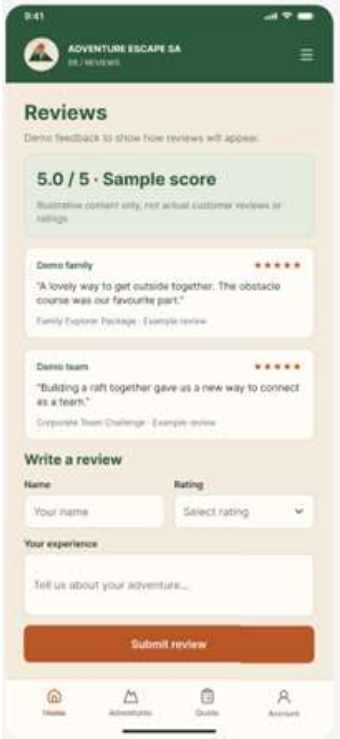

How it works

1. Check the sample quotation and the 5% discount
2. Choose Card or Bank transfer
3. Fill in the card details and tap Pay (sample only, no real payment)

Why we designed it this way

- Shows the discount clearly before paying
- No real payment is taken in this demo

Mobile: 06 Reviews

What this page does

- Sample score of 5.0 out of 5 and demo reviews
- Form to write a review: name, rating and experience
- Submit review button

How it works

1. Read the demo reviews
2. Enter a name, a rating and the experience
3. Tap Submit review

Why we designed it this way

- Reviews help new customers trust the business
- Marked as demo, because they are not real reviews

Mobile: 07 Overview

What this page does

- One adventure shown in detail: Ultimate Adventure Day, R1 500
- What's included: guided hike, ziplining, kayaking and lunch
- Add to quote button

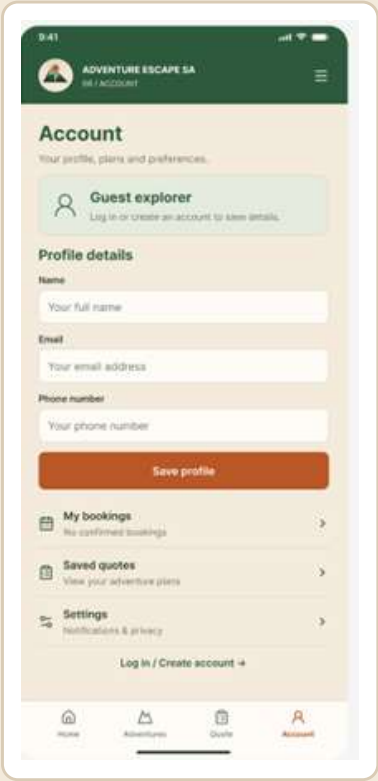

How it works

1. Scroll to see what is included
2. Tap Add to quote to add the adventure to the quote

Why we designed it this way

- Picture first, then price and what is included
- The main button stays at the bottom, easy to reach

Mobile: 08 Account

What this page does

- Guest explorer message and profile form (name, email, phone)
- Save profile button
- Links: My bookings, Saved quotes and Settings, and Log in / Create account

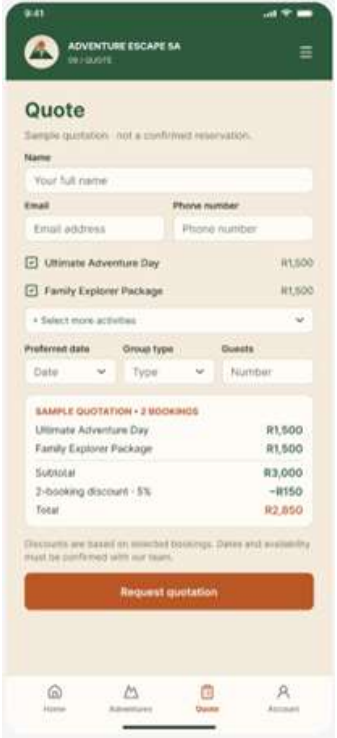

How it works

1. A guest can log in or create an account
2. Fill in the profile and tap Save profile
3. Open My bookings, Saved quotes or Settings

Why we designed it this way

- All personal things in one place
- Matches the Account button in the bottom menu

Mobile: 09 Quote

What this page does

- Name, email and phone number
- Selected activities with prices, preferred date, group type and number of guests
- Sample quotation with discount, and Request quotation button

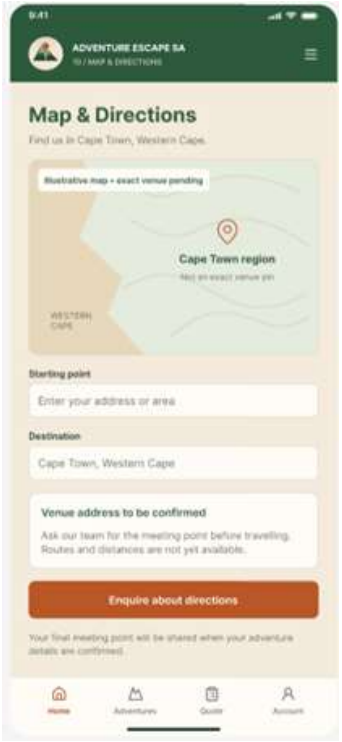

How it works

1. Fill in name, email and phone number
2. Tick the activities, then choose the date, group type and guests
3. The sample quotation shows the subtotal and the discount
4. Tap Request quotation

Why we designed it this way

- Users can plan a group trip in one form
- The discount updates with the number of bookings

Mobile: 10 Map and Directions

What this page does

- Map of the Cape Town, Western Cape area
- Starting point and destination fields
- Enquire about directions button

How it works

1. Type the starting point; the destination is Cape Town, Western Cape
2. Tap Enquire about directions to ask the team for help

Why we designed it this way

- Helps people plan how to get to the meeting point
- The exact address is confirmed by the team

Mobile: 11 Fees

What this page does

- Adventure price list: packages R1 500, individual sessions R750 each
- Book more, save more: 1 booking 0%, 2 bookings 5%, 3 bookings 10%, more than 3 bookings 15%
- Build your quote button

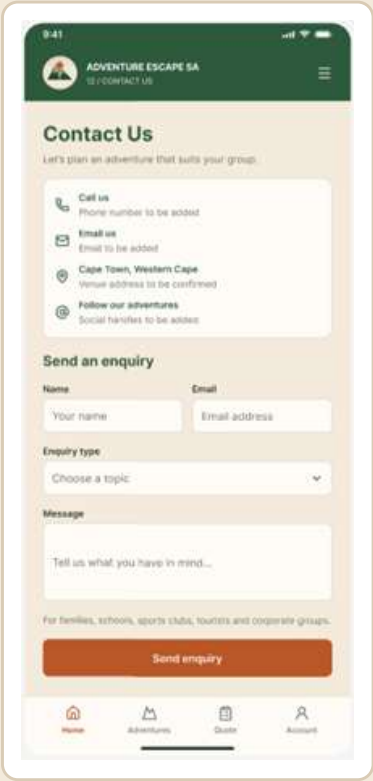

How it works

1. Read the price list and the discount table
2. Tap Build your quote to go to the Quote screen

Why we designed it this way

- Clear pricing and the discount rules in one place
- Same prices and rules as the website

Mobile: 12 Contact Us

What this page does

- Call, email, location and social media details
- Send an enquiry form: name, email, enquiry type and message
- Send enquiry button

How it works

1. Choose how to contact us: call, email or visit
2. Fill in the enquiry form and choose the enquiry type
3. Tap Send enquiry

Why we designed it this way

- Several ways to reach the business
- Enquiry type helps the team reply faster

Mobile: 13 Adventures

What this page does

- List of all adventures with a picture, short description and price
- Filters: All adventures, Packages and Sessions
- Message: pick more than one adventure to unlock discounts

How it works

1. Tap All adventures, Packages or Sessions to filter
2. Tap a card to open its Overview screen
3. Picking more than one adventure unlocks a discount

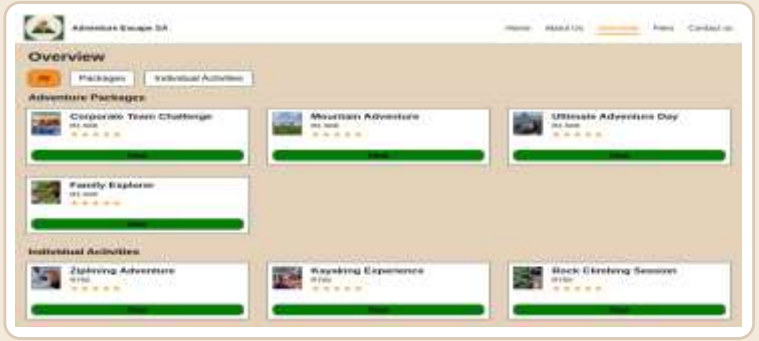

Why we designed it this way

- Same as the website Overview page, but in one column for a phone
- Tap a card to open the adventure

Website demonstration

Home: Featured packages

Overview: Filters and ratings

Package details: Arrows, date, Book Now

Fees: Add items, discount and total

Mobile app demonstration

- Choose adventures and add them to a quote
- Discount is worked out from the number of bookings: 2 bookings 5%, 3 bookings 10%, more than 3 bookings 15%
- Example: two R1 500 packages = R3 000, minus R150 (5%) = R2 850
- Sample payment, reviews, map and directions, and account screens are also included

Our team

R Rayan

- Researched the scenario
- Decided on the best design
- Wrote and managed the project documents

I Itumeleng

- Notes and group decisions
- Researched navigation, layout, responsive and UI design
- Built 6 mobile wireframes, chose the tools

A Asukia

- Researched website and app design ideas
- Logo design and colour palette
- Built 6 website wireframes, managed the Figma link

Thank you
